

Dr Gaurav G Jannawar is a young promising addition to our institute. He is a Plastic Reconstructive and Cosmetic surgeon who would be further strengthening our plastic surgery potential.

Dr Gaurav has completed his graduation from B.J Medical College Pune, he then completed his Post graduation from GMC Nagpur.

He is a board qualified Plastic Surgeon who has passed out of King George's Medical College, one of the most reputed plastic surgery institutes of country. He has also been awarded Gold medal in his exit exam and award for the best outgoing plastic surgeon of the year 2016 award by university.

He is also active on academic fronts by attending and presenting in various national and international conferences. He has been conferred International visiting scholarship in reconstructive microsurgery from reputed Chang Gung Memorial Hospital, Taiwan. He is also an international fellow in advanced aesthetic sciences from Innovare Chirurgia Medica Mexico.

His main interests are onco reconstructions, trauma, deformity corrections, aesthetic rhinoplasties and cosmetic surgery.

He has already been a part of humanitarian services by regularly attending lifeline express for doing free cleft surgeries in remote places of India. He was also a part of rescue team sent during the times of Nepal earthquake by UP Govt. He was felicitated for the same by Both Indian and Nepalese Govts.

We welcome such young and promising plastic surgeon with a social aptitude to our institute and wish him good luck!

Plastic and cosmetic surgery

Getting plastic surgery done is not always about getting a beautiful face or nose. A Plastic Surgeon operates on almost all the body areas doing many things other than beautification of face.

Plastic surgery also deals in restoring normalcy of a person after having lost major body parts to trauma, burn or cancer surgeries.

What does a plastic surgeon does

- Breast reduction or enhancement surgeries
- Liposuction
- Hair transplantation
- Surgeries for beautification of face and nose
- Surgeries for removal of birth patches/ tattoos
- Surgeries for restoring age (face lifts, body lifts)
- Treatment for non healing wounds
- Treatment for burns and deformities of burn
- Treatment for cleft lip and cleft palate
- Surgeries for reattaching severed body parts (Hand, Leg, ear etc.)
- Surgeries for leprosy patients
- Treatment for bed sores
- Surgeries for reconstruction after cancer surgeries
- Surgeries for facial paralysis
- Surgeries for sex change
- Surgery for management of vascular trauma

Mommy makeover

Motherhood no doubt is the most celestial thing for a woman. When a female is building a new human being inside her womb obviously her body takes toll. This entire process of reproduction leaves behind its trails in the form of altered body structure and lost body contours.

Well who says you have to alter your dressing sense and attitude once you have a baby, this is for those females who don't want to let go there pre pregnancy figure and still enjoy their motherhood.

Mommy make over will help you regain pre pregnancy figure which will involve multitude of procedures addressing abdominal fat, breast laxity, generalised body fat.

❖ Is it a single surgery?

No, Mommy make over will involve combination of liposuction, abdominoplasty and breast reduction/augmentation and mastopexy

❖ When can I get it done?

Mommy make over can be offered to all the females after their pregnancies when they have stopped lactating and are committed to lead to healthy life.

❖ Will it affect my future pregnancy?

No, this make over will only deal with altered body areas, it will involve tummy tuck, breast augmentation/reduction. This in any case won't affect your ability to conceive in future as all the internal organs are untouched.

❖ Where do I get it done?

For such kind of specialised plastic surgery procedures always consult a board certified Plastic surgeon.

Dr Gaurav Jannawar is both board qualified and specially trained at best of the institutes in the world for these life changing surgeries.

LIPOSUCTION

Human body is composed of skin, fat muscles and bone. Of all these fat is important as it imparts cushioning, provides energy, provides definite contour and definitely adds to body weight!

In common terms increased body weight is increased fat deposits which is partially true, because increased body weight is cumulation of increased muscle mass, skin mass, fat stores and water retention.

Liposuction literally means sucking out Fat from underneath your skin, this technique helps to oblivate unwanted extra fat lumps and helps regaining healthy body shape.

This is not a substitute for weight loss but it definitely boosts self image by restoring youthful body contours.

What to expect when getting liposuction done.

- An overnight admission
- Initial period of bloated appearance
- Few months of body contoured clothings

HIGH DEFINATION LIPO

This is a new technique for those who aspire a sculpted body with perfect curves and precise skin drape. This involves extensive liposuction to enhance body curves and to sculpt out right elevations to have that picture perfect body image.

- ❖ Worried about scars?

Well this is your lucky bait as all these liposuction services are absolutely free from the hustles of sutures and scars.

- ❖ When can I get it done?

Its a pretty straight forward procedure with standard protocols, just take a week out before you plan to show off your enhanced figure and it can be planned.

- ❖ Where should I get it done?

Always consult a board certified Plastic Surgeon who would first assess and accordingly plan your lipo experience. Dr Gaurav is both board certified and has specially been trained in all aspects of regular and high definition lipo in best of the centres of the world.

- ❖ Can this be combined with any other cosmetic procedures?

Yes , liposuction is routinely clubbed with tummy tucks and other procedures like rhinoplasties , face lifts etc.
